

Very powerful two-motor driven industrial dry vacuum cleaners with EasyDisposal

The ATTIX 963-21 ED XC is a powerful two-motor performance machine with an easy disposal bag. This disposal concept is perfect for Industrial use and disposing of heavy debris when finished.

The EasyDisposal (ED) models are perfect for building and construction applications, since the "container" is an external disposal bag, which can be replaced in seconds, so you can continue your work. The EasyDisposal bag found on the ATTIX 9 ED, allows you to work a very long time without removing a container to empty it and when necessary, you will simply change the bag and dispose it after the job is finished, extremely convenient and time-saving. The Stainless Steel Bag Holder Belt enables the easy change of the disposal bag without removing the motor head. Operating costs are minimised with the washable PET Fleece filter elements, and the low working noise level lets you work when others are nearby, without disturbing them. The standard XtremeClean filter cleaning allows you to work without any stops for cleaning the filter element. Just keep working. On top of the motor head you will find a big tool deposit and room to store your accessories. The Multifit container inlet gives access to the entire range of accessories to customise the machine to your specific needs.

PRODUCT FACTS

- Industrial specifications, robust construction and powerful; the definition of ATTIX 9
- Two motor Industrial performance
- Xtreme Clean fully automatic filter cleaning system for high efficiency
- Big surface PET Washable filter for high efficiency and low maintenance costs
- Steel frame with easy strap for perfect handling and disposal
- SoftStart will prevent blown fuses
- 10 metre cable for a large working radius
- 50mm accessories with industrial floor nozzle standard
